Subject Index

A

Abscisic acid
  duckweed turion morphogenesis and, 623
  lipid and oleosin biosynthesis and, in rape embryo, 563
  oxygenated, in barley aleurone layers and protoplasts, 573
  protein kinase responsive to, in wheat seedling, 1203
ACAD12, from *Arabidopsis thaliana*, cadmium stress and, 848
Acetyl-coenzyme A carboxylase
  biotin carboxylase subunit of, in tobacco, 805
  compartmentation of, 445
  in corn, 1299
Actin network, of soybean root, aluminum-induced rigor in, 897
Actinidia chinensis, *S*-adenosylmethionine synthetase in, 1307
Actinidia deliciosa (*see* Kiwifruit)
Actinidin, of kiwifruit, processing of, by transgenic tobacco, 261
S-Adenosylmethionine synthetase
  in *Actinidia chinensis*, 1307
  in petunia, 841
ADP-glucose pyrophosphorylase
  in corn embryo, 1333
  in potato tissue, 361
Aegilops squarrosa, Rubisco small subunit in, 1319
Aleurone layer, of barley
  acid release in, 769
  oxygenated abscisic acid in, 573
Alfalfa
  chalcone reductase genes in, 869
  Mslec1 gene in, 1311
  root nodule of
    lipo-chito oligosaccharide in, 1607
    oxygen-induced membrane depolarizations in, 235
  root of
    flavonoid production in, nitrogen and, 533
    isoflavonoid phytoalexin defense response in, suppression of, 1449
Allene oxide synthase and cyclase, in soybean tissue, 199
Allium porrum (*see* Leek)
Alternative pathway, in roots of *Poa*, *Festuca ovina*, and bean, 1179
Aluminum, soybean root rigor induced by, 897
4-Aminobutyrate shunt, in soybean cotyledon protoplasts, subcellular compartmentation of, 99
Aminocyclopropane-1-carboxylic acid *N*-malonyltransferase, in tomato fruit, 1241
Aminocyclopropane-1-carboxylic acid oxidase
  in broccoli floral tissue, 651, 857
  in senescing orchid petal, 833
AMP, cyclic, as second messenger, 885
Angiosperm seedling, chlorophyll biosynthesis in, light-dependent, 1505
Anthocyanin, in *Arabidopsis thaliana*, cytokinin induction of, 47
Apo-β-methylcrotonyl-coenzyme A, in tomato, 1133
Apomixis, 1345
Apoplast, of tomato, ionic composition of, during fruit ripening, 1679
Apple, calmodulin-binding protein kinase in, 847
Arabidopsis thaliana
  ACAD12 cDNA in, cadmium stress and, 849
  anthocyanin accumulation in, cytokinin induction of, 47
  asparaginase gene in, 1321
  chilling-induced heat evolution in, 995
  cinnamyl alcohol dehydrogenase homolog in, 1309
  cytochrome P450-dependent monooxygenase in, 875
  cytosolic cysteine synthase in, 851
  eceriferum mutation of, leaf of, epicuticular waxes of, 369
  flowering of, phytochrome overexpression and, 1495
  FRIGIDA gene in, vernalization, photoperiod and light quality and, 157
  gibberellin-insensitive mutant of, 495
  gibberellin 20-oxidase clones from, 1049
  glyceraldehyde-3-phosphate dehydrogenase gene regulation in, 1013
  hexokinase in, 879
  homolog of Dnaj protein in, 821
  H^+-ATPase from, catalytic sites in, 813
  hypocotyl of, cytokinin and light and, 1423
  indole-3-glycerol phosphate synthase in, 877
  *Lhcb1*3* gene in, CA-1 binding region of, phytochrome regulation and, 1023
  metal tolerance of, 29
  phenylalanine ammonia-lyase and chalcone synthase in, low temperature induction of, light dependence of, 39
  Pseudomonas-infected, systemic responses in, 1379
  seed of, fatty acid composition of, diacylglycerol acyltransferase activity and, 399
  seedling growth in, ethylene response of, 597
Armyworm larva, inhibition of, corn callus cysteine proteinase and, 1631
Ascorbate free radical reductase, induction of, by wounding, in tomato, 411
Ascorbate peroxidase
  in spinach cell, 1325
  in tobacco cell, 839
Asparaginase, in *Arabidopsis thaliana*, 1321
Asparagus
  fern of, senescence of, mRNA activity in, 125
  spear of, β-galactosidase from, 419
Asparagus officinalis (*see* Asparagus)
Atriplex canescens, nucleotide sequence of, 1289, 1291

B

Barley
  aleurone layers and protoplasts of, oxygenated abscisic acid in, 573
  aleurone layers and scutella of, acid release in, 769
  chloroplast of, carbonic anhydrase in, 433
  dehydrin 5 gene in, cold-induced expression of, 1233
  leaf of, RNA-dependent protein kinase encoded by, 1259
  phospholipid transfer protein in, 871
  pyrophosphate:fructose-6-phosphate 1-phosphotransferase in, allosteric regulation of, 69
  root of
    nitrate fluxes in, pH and calcium effects on, 727
    potassium and nitrate in, measurement of, 743
Bean (*see also* specific bean)
  hypocotyl of, secondary cell wall-specific glycoproteins from, 1001
  leaf of
    bean rust on, chlorophyll fluorescence induction in, 163
    methanol emission from, 1359
  malic enzyme gene regulation in, 949
  profilin from, 115
  root of, partitioning between cytochrome and alternative pathways in, 1179
Beet
  leaf of
    accelerated development of, 1647
    iron deficiency stress response in, 1487
  plasma membrane of
    H^+-ATPase of, 393
    intrinsic proteins of, 387
Beta vulgaris (*see* Beet)
Betula pendula (*see* Birch)
Bicarbonate transport, in *Chlorella ellipsoidea*, 247, 253
Biotin carboxylase subunit, of acetyl-coenzyme A carboxylase, in tobacco, 805
Birch, NAD(P)H-nitrate reductase mutation to NADH-nitrate reductase in, 203
Birdsfoot trefoil root nodule, oxygen-induced membrane depolarizations in, 235
Bradyrhizobium japonicum
  genistein-incubated, soybean root nodulation and, 961
  hemA mutant of, δ-aminolevulinic acid uptake in, 1547
Brassica campestris (*see* Cabbage, Chinese)
Brassica napus (*see* Canola, winter type; Rape)
Brassica oleracea (*see* Broccoli; Cabbage; Cauliflower)
Broad bean stomatal aperture, temperature control of, potassium channels and, 1161
Broccoli
  DNA strand transferase from, 379

floral tissue of, aminocyclopropane-1-carboxylic acid oxidase in, 651, 857
Bundle-sheath cells, of *Flaveria* leaf, CO_2 leakage from, 173

C

Cabbage
Chinese
metallothionein-like protein in, 863
photosystem II polypeptide precursor in, 867
leaf of, chloroplast stroma in, pH regulation in, 1059
Cadmium stress, *Arabidopsis thaliana* ACAD12 cDNA and, 848
Calcium/calmodulin, glutamate decarboxylase activation by, in soybean, 543
Callus, of corn, cysteine proteinase in, armyworm larval inhibition and, 1631
Calmodulin
from pea epicotyl, 435, 437
glutamate decarboxylase and
in petunia, 551
in soybean, 543
Calmodulin-binding heat-shock protein, in tobacco, 1197
Calmodulin-binding protein kinase, in apple, 847
Canola, winter type
BN28 protein in, 795
vernalization and gibberellin physiology of, 615
Carbohydrate
accumulation of, in wheat, atmospheric CO_2 and, 975
metabolism of, anoxia and, in rice seedling, 735
Carbon
inorganic, *Synechococcus* UTEX 625 nitrite reduction and, 313
metabolism of
in beet leaf, 1647
in pea leaf, 659
in vesicular-arbuscular mycorrhizal leek, 7
petitioning of, in eelgrass, 1665
Carbon dioxide
diurnal, rice leaf blade elongation and, 1471
elevated, wheat growth in, leaf mitochondria and, 469
leakage of, from *Flaveria* leaf bundle-sheath cells, 173
low, *Synechococcus* genomic region upstream of *rbcLS* and, 1461
transport of, in *Chlorella ellipsoidea*, 247, 253
Carbon dioxide compensation point, soybean shoot nitrogenase activity and photosynthesis at, 1455
Carnation flower, pollination-induced ethylene in, 1405
Carotene globules, in *Dunaliella bardawil*, protein associated with, 1657
Carrot
sucrose synthase in, 75
translation and mRNA stability in, heat shock and, 1703
Castor bean
leaf of, senescence of, phospholipase D expression in, 713
seed of, cDNA sequences of, 1141
Ca^{2+}-ATPase, of plasma membrane, regulatory domain of, in radish seedling, 105
Catharanthus roseus cell, inorganic phosphate homeostasis in, 295
Cationic peroxidase gene, in *Stylosanthes humilis*, 1303
Cauliflower, *apetala-1/squamous* homolog in, 441
Celery, NAD-dependent mannitol dehydrogenase from, 1219
Cell death, programmed, in pea, 489
Cell-wall invertase
in corn, 873
in tobacco, 825
Cell wall-specific glycoprotein, secondary, from bean hypocotyl, 1001
Chalcone reductase, in alfalfa, 869
Chalcone synthase, in *Arabidopsis thaliana*, low temperature induction of, light dependence of, 30
Chenopodium rubrum, apoplastic invertase of, 285
Chick weed, caffeoyl-coenzyme A methyltransferase of, 429
Chlamydomonas reinhardtii
chloroplast of, *ycf* gene in, cytochrome *c* biosynthesis and, 843
O-glycosylation mutants in, sterility in, 703
potassium fluxes in, 1527, 1537
Chlorella
CO_2 and bicarbonate transport in, 247, 253
photosynthetic shutdown in, *Paramecium bursaria* infection and, 1431
Chlorogonium, plastid and mitochondria of, gene expression in, 1641
Chlorophyll *a*/*b*-binding proteins, xanthophyll cycle and, in pea, 149
Chlorophyll biosynthesis
light-dependent, in angiosperm seedling, 1505
Synechococcus genomic region upstream of *rbcLS* and, 1461
Chlorophyll fluorescence
bean rust and, 163
quenching of, in spinach leaf and chloroplast, 721
Chloroplast
of barley, carbonic anhydrase in, 433
of cabbage, pH regulation in, 1059
of *Chlamydomonas reinhardtii*, *ycf* gene in, cytochrome *c* biosynthesis and, 843
of pea
α-glucosidase in, starch degradation and, 211
glutamine synthetase in, regulation of, 1109
of spinach
chlorophyll fluorescence in, quenching of, 721
development of, 685
oxidative pentose phosphate pathway in, 609
of sunflower, pH regulation in, 1059
of tobacco, pH regulation in, 1059
Choline monooxygenase, in spinach, 581
Cinnamoyl putrescine overproduction, in *Hyoscyamus muticus*, 1553
Cinnamyl alcohol dehydrogenase homolog, in *Arabidopsis thaliana*, 1309
Citrullus vulgaris (*see* Watermelon)
Citrus maxima (*see* Pummelo fruit)
Clarkia breweri, *Ipi*1 gene from, 855
Clover, white, root nodule of, oxygen-induced membrane depolarizations in, 235
Copper/zinc superoxide dismutase
in sweet potato, 827
in watermelon cotyledon, 1151
Corn
acetyl-coenzyme A carboxylase in, 1299
callus of, cysteine proteinase in, armyworm larval inhibition and, 1631
cell-wall invertase in, 825
eIF-4A translational initiation factor in, 1317
embryo of, ADP-glucose pyrophosphorylase in, 1333
endosperm of, starch branching enzyme I in, 1313
glucose-6-phosphate isomerase in, 1295
glutathione *S*-transferase in, 985
Ivr gene in, 1293
late embryogenesis abundant group 3 protein in, 1337
leaf of, protein synthesis in, ozone and, 777
photosynthetic efficiency in, temperature and, 761
phytoene desaturase gene in, 1329
root of
anoxic, survival of, 589
growth of, water stress and, 303
H^+-ATPase in, fluoride and fluoroaluminate inhibition of, 241
xyloglucan *endo*transglycosylase homolog in, 439
seed of, metallothionein in, 831
seedling mitochondria of, peroxidases in, 1597
vegetative and reproductive maturity in, gibberellins and, 475
Corydalis sempervirens, plastidic chlorismate synthase in, 1127
Cotton
chilling-induced heat evolution in, 995
cotyledon of, ribosomal protein S4e in, 431
extensin-pectin cross-link in, 1691
fiber of, proline-rich protein of, 669
vacuolar H^+-ATPase proteolipids in, tissue-specific regulation of, 1395
Cottonwood leaf, methanol emission from, 1359
Cotyledon
of cotton, ribosomal protein S4e in, 431
of mustard, flavonoid biosynthesis and DNA photolyase formation in, UV inhibition of, 227
of soybean, protoplasts from, 4-aminobutyrate shunt in, subcellular compartmentation of, 99
of watermelon, peroxisomal Cu/Zn superoxide dismutase in, 1151
Coumaric acid, corn glutathione *S*-transferase conjugation to, 985
Coumaric acid:coenzyme A, from loblolly pine xylem, 85
cox1 gene, in potato tuber callus mitochondria, 1327
Cucumber
chilling-induced heat evolution in, 995
mitochondria of, pyruvate dehydrogenase in, 1623

Cucumis sativus (*see* Cucumber)
Cuphea wrightii, β-ketoacyl-acyl carrier protein synthase III in, 443
Cu^{2+} reduction, by tomato root, 1093
Cyanobacterium, photosystem I polypeptides in, 1067
Cysteine proteinase, in corn callus, armyworm larval inhibition and, 1631
Cysteine synthase, in *Arabidopsis thaliana* cell, 851
Cytochrome *c* biosynthesis, *Chlamydomonas reinhardtii* chloroplast *ycf* gene and, 843
Cytochrome P450-dependent monooxygenase, in *Arabidopsis thaliana*, 875
Cytochrome pathway, in roots of *Poa*, *Festuca ovina*, and bean, 1179
Cytokinin
  anthocyanin induction by, in *Arabidopsis thaliana*, 47
  Arabidopsis thaliana hypocotyl elongation and, 1423

D

Daucus carota (*see* Carrot)
Defensins, 1353
Dehydrin 5 gene, in barley, cold-induced expression of, 1233
Deoxy-D-*arabino*-heptulosonate-7-phosphate synthase, in potato stem, 1413
Diacylglycerol acyltransferase, *Arabidopsis thaliana* seed fatty acid composition and, 399
Dimethylsulfoniopropionate biosynthesis, in *Wollastonia biflora*, 1439
3,5-Dioxo-4-butyryl-cyclohexane carboxylic acid ethyl ester, pea fruit growth and gibberellin content and, 517
DNA, UV radiation damage to, repair of, 891
DNA photolyase, formation of, UV inhibition of, in mustard cotyledon, 227
DNA strand transferase, in broccoli, 379
Drought sensitivity
  proline accumulation and, in tobacco, pyrroline-5-carboxylate synthetase and, 1387
  wheat thylakoid lipid composition and protein dynamics and, 191
Duckweed, turion morphogenesis in, abscisic acid and, 623
Dunaliella bardawil, carotene globules in, protein associated with, 1657

E

Eelgrass, carbon petitioning in, 1665
Eggplant, chilling-induced heat evolution in, 995
eIF-4A translational initiation factor, in corn, 1317
Elaeagnus angustifolia (*see* Russian olive)
Embryo
  of corn, ADP-glucose pyrophosphorylase in, 1333
  of rape, lipid and oleosin biosynthesis in, abscisic acid and, 563
Embryonic tissue, of *Pinus caribaea*, germin-like proteins secreted by, 141
Endosperm, of corn, starch branching enzyme I in, 1313
Enolase, in ice plant, stress-induced expression of, 1185
Epicotyl, of pea
  calmodulin cDNA in, 435, 437
  phenylalanine ammonia-lyase in, elicitor-mediated activation of, nuclear factors in, 129
Episcia cupreata Hook, chilling-induced heat evolution in, 995
Ethylene, pollination-induced, in carnation, 1405
Ethylene response, of *Arabidopsis thaliana* seedling, 597
Exo-(1→4)-β-D-galactanase, in tomato fruit, 1099
Extensin, pectin cross-link with, in cotton, 1691

F

Farnesyl pyrophosphate synthase, in lupin, 835
Fatty acid, of *Arabidopsis thaliana* seed, diacylglycerol acyltransferase activity and, 399
Fatty acid hydroperoxide, in soybean seed, chain cleavage of, 1211
Fen kinase, serine/threonine specificity of, 1735
Fern, asparagus, senescence of, mRNA activity in, 125
Festuca ovina root, partitioning between cytochrome and alternative pathways in, 1179
Fiber, of cotton, proline-rich protein of, 669
Flaveria leaf
  bundle-sheath cells of, CO_2 leakage in, 173
  NADP-malate dehydrogenase in, 1119
Flavonoid
  biosynthesis of, UV inhibition of, in mustard cotyledon, 227
  production of, nitrogen and, in alfalfa root, 533
Flavonol glycosyltransferase, in petunia pollen, 903
Flower
  of *Arabidopsis thaliana*, phytochrome overexpression and, 1495
  of broccoli, aminocyclopropane-1-carboxylic acid oxidase in, 651, 857
  of carnation, pollination-induced ethylene in, 1405
Fluoride, corn root H^+-ATPase inhibition by, 241
Fluoroaluminate, corn root H^+-ATPase inhibition by, 241
FRIGIDA gene, in *Arabidopsis*, vernalization, photoperiod and light quality and, 157
Fructose 1,6-bisphosphatase, in rape, 1335
Fructose 2,6-bisphosphate, starch mobilization and, in tobacco leaf, 1569
Fruit
  of pea, 3,5-dioxo-4-butyryl-cyclohexane carboxylic acid ethyl ester and, 517
  of pummelo, transcript homologous to ripening-induced genes in, 1323
  of tomato
    aminocyclopropane-1-carboxylic acid *N*-malonyltransferase in, 1241
    exo-(1→4)-β-D-galactanase in, 1099
    ripening of, apoplast ionic composition during, 1679

G

G protein
  α subunit of, in soybean, 1315
  in tobacco leaf, 59
β-Galactosidase, in asparagus spear tip, 419
Genistein, *Bradyrhizobium japonicum* incubated in, soybean root nodulation and, 961
Geranylgeranyl pyrophosphate synthase, in lupin, 835
Germin-like protein, secreted by *Pinus caribaea* embryonic tissue, 141
Gibberellin
  Arabidopsis thaliana insensitivity to, 495
  biosynthesis of, in phytochrome-deficient sorghum, 337
  calcium-dependent protein kinase and, in rice, 787
  3,5-dioxo-4-butyryl-cyclohexane carboxylic acid ethyl ester and, in pea, 517
  and vegetative and reproductive maturity of corn, 475
  in winter canola, 615
Gibberellin 20-oxidase clones, in *Arabidopsis thaliana*, 1049
Glucose-6-phosphate isomerase, in corn, 1295
α-Glucosidase, in pea chloroplast, starch degradation and, 211
β-Glucosidase, zeatin-*O*-glucoside-degrading, in rape seed, 1369
Glutamate decarboxylase
  calcium/calmodulin activation of in soybean, 543
  calmodulin-binding, in petunia, 551
Glutamine synthetase, regulation of, in pea chloroplast, 1109
Glutathione *S*-transferase, in corn, 985
Glyceraldehyde-3-phosphate dehydrogenase, genes encoding, regulation of, in *Arabidopsis thaliana*, 1013
Glycine max (*see* Soybean)
Glycine soja root nodule, lipo-chitin oligosaccharides and, 1587
Glycoprotein, cell wall-specific, secondary, from bean hypocotyl, 1001
O-Glycosylation, *Chlamydomonas reinhardtii* mutants affecting, sterility in, 703
Gossypium hirsutum (*see* Cotton)
Grain, of wheat, glycosylated protein disulfide isomerase in, 327

H

H^+-ATPase
  of *Arabidopsis thaliana*, catalytic sites in, 813
  of beet, 393
  of corn root, fluoride and fluoroaluminate inhibition of, 241
  of plasma membrane, 1
H^+-ATPase proteolipids, vacuolar, tissue-specific regulation of, 1395
H^+-translocating pyrophosphatase, vacuolar, in rice seedling, anoxia and chilling and, 641
Heat evolution, chilling-induced, 995

Heat shock, translation and mRNA stability and, in carrot, 1703
Heat-shock protein
calmodulin-binding, in tobacco, 1197
in soybean, pea, mung bean, and rice, 693
Helianthus annuus (*see* Sunflower)
Heterosigma akashiwo plasma membrane, Na^+-ATPase from, 1615
Hexokinase, in *Arabidopsis thaliana*, 879
Hordeum vulgare (*see* Barley)
Hydrogen peroxide
production of, in parsley, salicylic acid and, 1171
salicylic acid biosynthesis and, in tobacco, 1673
Hyoscyamus muticus, tropane alkaloid biosynthesis in, 1553
Hypocotyl
of *Arabidopsis thaliana*, cytokinin and light and, 1423
of bean, secondary cell wall-specific glycoproteins from, 1001

I

Ice plant, stress-induced enolase expression in, 1185
Indoleacetic acid, in tobacco leaf, measurement of, 1043
Indole-3-glycerol phosphate synthase, in *Arabidopsis thaliana*, 877
Invertase
apoplastic, of *Chenopodium rubrum*, induction of, 285
Ivr gene for, in corn, 1293
Ipomoea batatas (*see* Sweet potato)
Iron, in tomato *chloronerva* mutant, 269
Iron deficiency stress response, in beet leaf, 1487
Isocitrate lyase, in tomato, 1339
Isolflavonoid phytoalexin defense response, suppression of, in mycorrhizal alfalfa root, 1449
Isopentenyl pyrophosphate isomerase, *Clarkia breweri* gene encoding, 855

J

Jasmonic acid pathway, enzymes of, in soybean tissue, 199
Jasmonic acid signaling, in tomato leaf, salicylic acid and, 1741

K

β-Ketoacyl-acyl carrier protein synthase III, from *Cuphea wrightii*, 443
Kiwifruit, protease actinidin of, processing of, in transgenic tobacco, 261

L

Lactuca sativa (*see* Lettuce)
Late embryogenesis abundant group 3 protein, in corn, 1337
Leaf
of *Arabidopsis thaliana eceriferum* mutation, epicuticular waxes of, 369
of barley, RNA-dependent protein kinase encoded by, 1259
of bean
bean rust on, chlorophyll fluorescence induction in, 163
methanol emission from, 1359
of beet
accelerated development of, 1647
iron deficiency stress response in, 1487
of cabbage, chloroplast stroma in, pH regulation in, 1059
of castor bean, senescence of, phospholipase D expression in, 713
of corn, protein synthesis in, ozone and, 777
of cottonwood, methanol emission from, 1359
of *Flaveria*
bundle-sheath cells of, CO_2 leakage in, 173
NADP-malate dehydrogenase in, 1119
of pea, carbon metabolism enzymes in, 659
of potato, violaxathin cycle pigment content in, 1479
of rice, CO_2 diurnal regulation of, 1471
of Russian olive, methanol emission from, 1359
of soybean
methanol emission from, 1359
nucleotide pyrophosphatase/phosphodiesterase I in, 1269
proteinase from, 969
of spinach
chlorophyll fluorescence in, quenching of, 721
nitrate reductase in, regulation of, 1083
oxidative pentose phosphate pathway in, 609
protein kinases and nitrate reductase in, 1077, 1083
protein kinases and sucrose-phosphate synthase in, 1077
sucrose-phosphate synthase in, antibodies cross-reacting with, 219
of sunflower, chloroplast stroma in, pH regulation in, 1059
of tobacco
chloroplast stroma in, pH regulation in, 1059
GTP-binding proteins in, 59
indoleacetic acid in, measurement of, 1043
PR-1 proteins in, antifungal activity of, 17
RNA-dependent protein kinase encoded by, 1259
salicylic acid biosynthesis in, hydrogen peroxide and, 1673
starch mobilization in, fructose bisphosphate level and, 1569
violaxathin cycle pigment content in, 1479
of tomato, PR-1 proteins in, antifungal activity of, 17
of velvet bean, methanol emission from, 1359
of wheat, mitochondrial increase in, elevated CO_2 and, 469
LEDI-1 gene, in *Lithospermum erythrorhizon*, 1331
Leek, mycorrhizal, vesicular-arbuscular, carbon metabolism in, 7
Legume (*see also* specific plant)
root nodules of, oxygen-induced membrane depolarization in, 235
Lettuce, cells of, *Pseudomonas syringae* hypersensitivity of, 503
*Lhcb1*3* gene, in *Arabidopsis thaliana*, CA-1 binding region of, phytochrome regulation and, 1023
Light
Arabidopsis thaliana hypocotyl elongation and, 1423
red, insensitivity to, in tomato mutant, 939
Lignin *O*-methyltransferase, in *Zinnia elegans*, 459
Lima bean, chilling-induced heat evolution in, 995
Limnanthes douglasii (*see* Meadowfoam)
Linoleic acid, fatty acid hydroperoxide cleavage by, in soybean seed, 1211
Linoleic acid desaturase, in meadowfoam, 861
Lipid biosynthesis, in rape embryo, abscisic acid and, 563
Lipo-chitin oligosaccharide, nodule induction and
in alfalfa, 1607
in *Glycine soja*, 1587
Lithospermum erythrorhizon, *LEDI-1* gene in, 1331
Lotus corniculatus (*see* Birdsfoot trefoil)
Lupin
farnesyl pyrophosphate synthase in, 835
geranylgeranyl pyrophosphate synthase in, 835
Lycopersicon esculentum (*see* Tomato)

M

Maize (*see* Corn)
Malic enzyme
alternative pathway stimulation by, in potato tuber callus mitochondria, 1035
regulation of, in bean, 949
Malus domestica (*see* Appie)
Mannitol dehydrogenase, NAD-dependent, from celery, 1219
Mass flow, in *Myriophyllum heterophyllum*, 1251
Meadowfoam, linolenic acid desaturase in, 861
Medicago sativa (*see* Alfalfa)
Mesembryanthemum crystallinum (*see* Ice plant)
Metallothionein, seed-specific, in corn, 831
Metallothionein-like protein, in Chinese cabbage, 863
Metal tolerance, of *Arabidopsis thaliana*, 29
Methanol emission, from leaf, 1359
O-Methyltransferase, in *Zinnia elegans*, 459
Mitochondria
of *Chlorogonium*, gene expression in, 1641
of cucumber, pyruvate dehydrogenase in, 1623
of potato, pyruvate dehydrogenase in, 1623
of potato tuber callus
alternative pathway of, succinate and malate stimulation of, 1035
cox1 gene in, 1327
of wheat leaf, elevated CO_2 and, 469
Mslec1 gene, in alfalfa, 1311
Mucuna sp. (*see* Velvet bean)
Mung bean, low molecular mass heat-shock protein complex in, 693

Mustard
cotyledon of, flavonoid biosynthesis and DNA photolyase formation in, UV inhibition of, 227
SaMADS C in, 853
Mycorrhizal alfalfa root, isoflavonoid phytoalexin defense response in, suppression of, 1449
Mycorrhizal leek, vesicular-arbuscular, carbon metabolism in, 7
Mycorrhizal soybean, rhizobial nodulation factors and, 1519
Myriophyllum heterophyllum, mass flow in, 1251

N

Na^+-ATPase, from *Heterosigma akashiwo* plasma membrane, 1615
NAD-dependent mannitol dehydrogenase, from celery, 1219
NADH:ubiquinone oxidoreductase, PSST subunit of, in senescing broccoli floret, 859
NAD(P)H-nitrate reductase, mutation of, to NADH-nitrate reductase, in birch, 203
NADP-malate dehydrogenase, in *Flaveria* leaf, 1119
Nicotiana (*see* Tobacco)
Nitrate
fluxes in, pH and calcium effects on, in barley root, 727
measurement of, in barley root, 743
Nitrate reductase, in spinach leaf
protein kinases and, 1077, 1083
regulation of, 1083
Nitrite, reduction in, in *Synechococcus* UTEX 625, inorganic carbon and, 313
Nitrogen, flavonoid production and, in alfalfa root, 533
Nitrogenase activity, in soybean shoot at CO_2 compensation point, 1455
Nodulation factor, rhizobial, in soybean, 1519
Nodule (*see* Root nodule)
Norway spruce, stress lignin in, 1277
Nucleotide pyrophosphatase/phosphodiesterase I, in soybean leaf, 1269

O

Oleosin biosynthesis, in rape embryo, abscisic acid and, 563
Orchid, petal of, senescing, aminocyclopropane-1-carboxylate oxidase from, 833
Oryza sativa (*see* Rice)
Osmotin-like protein genes, in wild potato, fungal pathogen stimulation of, 929
Ozone, protein synthesis and, in corn leaf, 777

P

Paramecium bursaria Chlorella virus, *Chlorella* photosynthetic shutdown and, 1431
Parsley, H_2O_2 production in, salicylic acid and, 1171
Pea
chilling-induced heat evolution in, 995
chloroplast of α-glucosidase in, starch degradation and, 211
glutamine synthetase in, regulation of, 1109
epicotyl of
calmodulin cDNA in, 435, 437
phenylalanine ammonia-lyase in, elicitor-mediated activation of, nuclear factors in, 129
fruit growth and gibberellin content of, 3,5-dioxo-4-butyryl-cyclohexane carboxylic acid ethyl ester and, 517
leaf of, carbon metabolism enzymes in, 659
low molecular mass heat-shock protein complex in, 693
phytochrome B deficiency in, 525
plastids of, acetyl-coenzyme A carboxylase in, 445
programmed cell death in, detection of, 489
root of, quinate metabolism in, 319
root nodule of
peribacteroid membrane ATPase of, 1227
water-stressed, antioxidants and prooxidants in, 753
xanthophyll cycle in, 149
Pectin, extensin cross-link with, in cotton, 1691
Pentose phosphate pathway, oxidative, in spinach chloroplast and leaf, 609
Peribacteroid membrane ATPase, of pea root nodule, 1227
Peroxidase, cationic, in *Stylosanthes humilis*, 1303
Peroxidative scavenging, and interaction between soybean/tobacco and pathogen, 353
Petal
of orchid, senescing, aminocyclopropane-1-carboxylate oxidase in, 833
of rose, senescing, membrane lipids and, 1029
Petroselinum crispum (*see* Parsley)
Petunia
cellular ubiquinone in, in vivo reduction of, 277
glutamate decarboxylase in, calmodulin-binding, 551
pollen of, flavonol glycosyltransferases in, 903
S-adenosylmethionine synthetase in, 841
pH, regulation of, in chloroplast of cabbage, sunflower, and tobacco, 1059
Phaseolus limensis (*see* Lima bean)
Phaseolus vulgaris (*see* Bean)
Phenylalanine ammonia-lyase, in *Arabidopsis thaliana*, low temperature induction of, light dependence of, 39
Phenylalanine ammonia-lyase
in pea epicotyl, elicitor-mediated activation of, nuclear factors in, 129
in *Stylosanthes humilis*, 1301
Phenylpropanoids, corn glutathione *S*-transferase conjugation to, 985
Phosphate, inorganic, uptake of, by *Catharanthus roseus* cell, 295
Phospho*enol*pyruvate carboxylase, in soybean root nodule, phosphorylation of, 1561
Phospholipase D, in castor bean leaf senescence, 713
Phospholipid transfer protein, in barley, 871
Phosphoric acid, release of, in barley aleurone layers and scutella, 769
Photoperiod, sensitivity to, in phytochrome-deficient sorghum, 345
Photosynthesis
in *Chlorella*, *Paramecium* virus infection and, 1431
CO_2 leakage of bundle-sheath cells during, 173
in corn, temperature and, 761
reduced capacity for, in potato and tobacco leaf, violaxathin cycle pigment contents and, 1479
in soybean shoot at CO_2 compensation point, 1455
in wheat, atmospheric CO_2 and, 975
Photosystem I, in tobacco, 1297
Photosystem I polypeptides, in *Synechocystis*, 1067
Photosystem II polypeptides, precursors of, in Chinese cabbage, 867
Phytochrome
deficiency of
gibberellin biosynthesis and, in sorghum, 337
in pea, 525
photoperiod sensitivity and, in sorghum, 345
in red light-insensitive tomato mutant, 939
flavonoid biosynthesis and DNA photolyase formation induced by, UV inhibition of, in mustard cotyledons, 227
regulation of, *Arabidopsis thaliana Lhcb1*3* gene CA-1 binding region and, 1023
Phytoene desaturase, in corn, 1329
Phytophthora infestans
osmotic-like protein gene activation by, in wild potato, 929
PR-1 protein inhibition of, in tobacco and tomato leaf, 17
Picea abies (*see* Norway spruce)
Pine, loblolly, xylem of, coumarate:coenzyme A in, 85
Pinus caribaea, embryonic tissues of, germin-like proteins secreted by, 141
Pinus taeda (*see* Pine, loblolly)
Pisum sativum (*see* Pea)
Plant Gene Register
Actinidia chinensis, *S*-adenosylmethionine synthetase in, 1307
Aegilops squarrosa, Rubisco small subunit in, 1319
alfalfa
chalcone reductase genes in, 869
Mslec1 gene in, 1311
apple, calmodulin-binding protein kinase in, 847
Arabidopsis thaliana
ACAD12 cDNA from, cadmium stress and, 849
asparaginase gene in, 1321
cinnamyl alcohol dehydrogenase homolog in, 1309
cytochrome P450-dependent monooxygenase in, 875
cytosolic cysteine synthase in, 851
Dnaj protein homolog in, 821

hexokinase in, 879
indole-3-glycerol phosphate synthase in, 877
asparagus spear cDNA clone, β-galactosidase encoded by, 419
Atriplex canescens, nucleotide sequence of, 1289, 1291
barley
carbonic anhydrase in, 433
phospholipid transfer protein in, 871
broccoli, floret of, senescing, aminocyclopropane-1-carboxylic acid synthase in, 857
cabbage
metallothionein-like protein in, 863
photosystem II polypeptide precursor in, 867
cauliflower *apetala-1/squamosa* homolog in, 441
chick weed, caffeoyl-coenzyme A methyltransferase of, 429
Chlamydomonas reinhardtii, chloroplast of, *ycf* gene in, cytochrome *c* biosynthesis and, 843
Clarkia breweri, *Ipi*1 gene in, 855
corn
acetyl-coenzyme A carboxylase in, 1299
cell-wall invertase in, 873
eIF-4A translational initiation factor in, 1317
embryo of, ADP-glucose pyrophosphorylase in, 1333
endosperm of, starch branching enzyme I in, 1313
glucose-6-phosphate isomerase in, 1295
Ivr gene in, 1293
late embryogenesis abundant group 3 protein in, 1337
phytoene desaturase gene in, 1329
seed-specific metallothionein in, 831
xyloglucan *endo*transglycosylase homolog in, 439
cotton cotyledon, ribosomal protein S4e in, 431
Cuphea wrightii, β-ketoacyl-acyl carrier protein synthase III in, 443
Lithospermum erythrorhizon, *LEDI-1* gene in, 1331
lupin
farnesyl pyrophosphate synthase in, 835
geranylgeranyl pyrophosphate synthase in, 835
meadowfoam, linolenic acid desaturase in, 861
mustard, SaMADS C in, 853
orchid petal, senescing, aminocyclopropane-1-carboxylate oxidase in, 833
pea, calmodulin cDNA in, 435, 437
petunia, *S*-adenosylmethionine synthetase in, 841
potato, mitochondria of, *cox1* gene in, 1327
pummelo, fruit of, transcript homologous to ripening-induced genes in, 1323
rape, fructose-1,6-bisphosphatase in, 1335
Rhodobacter capsulatus hemB gene in, 421
Rhodobacter capsulatus hemE gene in, 423
rice
pRMA630 gene in, 865
seed of, stearoyl-acyl carrier protein desaturase from, 845
β-tubulin isotypes in, 823
soybean, G protein α subunit in, 1315
spinach, cytosolic ascorbate peroxidase in, 1325
Stylosanthes humilis
cationic peroxidase in, 1303
phenylalanine ammonia-lyase in, 1301
sweet potato
Cu/Zn-superoxide dismutase in, 827
sporamin gene in, 829
Synechococcus elongatus, *psbA* genes in, 1305
tobacco
cell-wall invertase in, 825
cytosolic ascorbate peroxidase in, 839
photosystem I gene in, 1297
S_7-RNAse in, 427
tomato, isocitrate lyase in, 1339
Plasma membrane
Ca^{2+}-ATPase of, regulatory domain of, in radish seedling, 105
H^+-ATPase of, 1
in beet, 393
Plastid
of *Chlorogonium*, gene expression in, 1641
of pea, acetyl-coenzyme A carboxylase in, 445
Plastidic chlorismate synthase, in *Corydalis sempervirens*, 1127
Poa, root of, partitioning between cytochrome and alternative pathways in, 1179
Pollen, of petunia, flavonol glycosyltransferases in, 903
Pollination, ethylene induced by, in carnation, 1405
Populus deltoides (*see* Cottonwood)
Potassium, measurement of, in barley root, 743
Potassium channel, and temperature control of broad bean stomatal aperture, 1161
Potassium channel protein, in spinach thylakoid, 1725
Potassium flux, in *Chlamydomonas reinhardtii*, 1527, 1537
Potato
cellular ubiquinone in, in vivo reduction of, 277
chilling-induced heat evolution in, 995
leaf of, violaxathin cycle pigment content in, 1479
mitochondria of, pyruvate dehydrogenase in, 1623
stem of, deoxy-D-*arabino*-heptulosonate-7-phosphate synthase and, 1413
tissue of, ADP-glucose pyrophosphorylase in, 361
tuber callus mitochondria of
alternative pathway of, succinate and malate stimulation of, 1035
cox1 gene in, 1327
wild, osmotin-like protein genes in, fungal pathogen stimulation of, 929
PR-1 protein, in tobacco and tomato leaf, antifungal activity of, 17
pRMA630 gene, in rice, 865
Profilin, in bean, 115
Proline, osmotolerance and, in tobacco, pyrroline-5-carboxylate synthetase and, 1387
Proplastid, of spinach, development of, 685
Protein
BN28, in winter canola, 795
chlorophyll *a*/*b*-binding, xanthophyll cycle and, in pea, 149
Dnaj, homolog of, in *Arabidopsis thaliana*, 821
G
α subunit of, in soybean, 1315
in tobacco leaf, 59
germin-like, secreted by *Pinus caribaea* embryonic tissue, 141
GTP-binding, in tobacco leaf, 59
intrinsic, in beet plasma membrane, 387
metallothionein-like, in Chinese cabbage, 863
phospholipid transfer, in barley, 871
PR-1, antifungal activity of, in tobacco and tomato leaf, 17
proline-rich, in cotton fiber, 669
S4e, ribosomal, in cotton cotyledon, 431
synthesis of, in corn leaf, ozone and, 777
ubiquitin, in rice, 865
Protein disulfide isomerase, glycosylated, in wheat grain, 327
Protein kinase
abscisic acid-responsive, in wheat seedling, 1203
calcium-dependent, in rice, gibberellin and, 787
calmodulin-binding, in apple, 847
RNA-dependent, tobacco- and barley-encoded, 1259
signal transduction and, 451
in spinach leaf, sucrose-phosphate synthase and nitrate reductase and, 1077, 1083
Proteinase, in soybean leaf, 969
Protoplast, of barley, oxygenated abscisic acid in, 573
psbA gene, in *Synechococcus elongatus*, 1305
Pseudomonas syringae
Arabidopsis thaliana infected with, systemic responses in, 1379
lettuce cell hypersensitivity to, 503
tobacco and soybean interaction with, peroxidative and H_2O_2 scavenging and, 353
Pto kinase, serine/threonine specificity of, 1735
Pummelo fruit, transcript homologous to ripening-induced genes in, 1323
Pyrophosphate:fructose-6-phosphate 1-phosphotransferase, in barley, allosteric regulation of, 69
Pyrroline-5-carboxylate synthetase, proline accumulation and, in tobacco, osmotolerance and, 1387
Pyruvate dehydrogenase, in mitochondria of potato and cucumber, 1623

Q

Quinate, metabolism of, in pea root, 319

R

Radish, seedling of, plasma membrane Ca^{2+}-ATPase in, regulatory domain of, 105

Rape
embryo of, lipid and oleosin biosynthesis in, abscisic acid and, 563
fructose-1,6-bisphosphatase in, 1335
seed of, zeatin-*O*-glucoside-degrading β-glucosidase in, 1369
Raphanus sativus (*see* Radish)
Rhodobacter capsulatus
hemB gene of, 421
hemE gene of, 423
Ribulose-1,5-bisphosphate carboxylase/oxygenase
in carboxysome-deficient *Synechococcus* mutant, 183
small subunit of, in *Aegilops squarrosa*, 1319
Rice
β-tubulin isotypes in, 823
calcium-dependent protein kinase in, gibberellin and, 787
chilling-induced heat evolution in, 995
leaf blade of, CO_2 diurnal regulation of, 1471
low molecular mass heat-shock protein complex in, 693
seed of, stearoyl-acyl carrier protein desaturase in, 845
seedling of
carbohydrate metabolism in, anoxia and, 735
salicylic acid in, 633
vacuolar H^+-translocating pyrophosphatase in, anoxia and chilling and, 641
soluble starch synthase of, genetic structure of, 677
Ricinus communis (*see* Castor bean)
Ripening-induced genes, in pummelo fruit, 1323
RNA-dependent protein kinase, barley- and tobacco-encoded, 1259
Robinia wood, vessel-associated cells in, vascular sap pH and, 913
Root
of alfalfa
flavonoid production in, nitrogen and, 533
isoflavonoid phytoalexin defense response in, suppression of, 1449
of barley, nitrate fluxes in, pH and calcium effects on, 727
of bean, partitioning between cytochrome and alternative pathways in, 1179
of corn
anoxic, survival of, 589
growth of, water stress and, 303
H^+-ATPase in, fluoride and fluoroaluminate inhibition of, 241
xyloglucan *endo*transglycosylase homolog in, 439
of *Festuca ovina*, partitioning between cytochrome and alternative pathways in, 1179
of leek, mycorrhizal, carbon metabolism in, 7
of *Poa*, partitioning between cytochrome and alternative pathways in, 1179
of soybean, actin network of, aluminum-induced rigor in, 897
of tomato, Cu^{2+} reduction by, 1093
Root nodule
of alfalfa, lipo-chito oligosaccharide in, 1607
of *Glycine soja*, lipo-chitin oligosaccharides and, 1587
of legume, oxygen-induced membrane depolarizations in, 235
of pea
peribacteroid membrane ATPase of, 1227
quinate metabolism in, 319
of soybean
genistein-incubated *Bradyrhizobium japonicum* and, 961
oxygen-induced membrane depolarizations in, 235
phospho*enol*pyruvate carboxylase in, phosphorylation of, 1561
Rose petal, membrane lipids of, senescence and, 1029
Russian olive leaf, methanol emission from, 1359

S

Salicylic acid
biosynthesis of, in tobacco, hydrogen peroxide and, 1171
in parsley, hydrogen peroxide production and, 1171
in rice seedling, 633
systemin and jasmonic acid signaling and, in tomato leaf, 1741
Saline tolerance, proline accumulation and, in tobacco, pyrroline-5-carboxylate synthetase and, 1387
SaMADS C, from mustard, 853
Sap, vascular, pH of, *Robinia* wood vessel-associated cells and, 913
Scutella, of barley, acid release in, 769
Seed
apomixis and, 1345
of *Arabidopsis thaliana*, fatty acid composition of, diacylglycerol acyltransferase activity and, 399
of castor bean, cDNA sequences of, 1141
of rape, zeatin-*O*-glucoside-degrading β-glucosidase in, 1369
of rice, stearoyl-acyl carrier protein desaturase in, 845
of soybean, fatty acid hydroperoxide in, chain cleavage of, 1211
of tamarind, xyloglucan fragment fractionation and cellulose interaction in, 1579
Seedling
of angiosperm, light-dependent chlorophyll biosynthesis in, 1505
of *Arabidopsis thaliana*, ethylene response of, 597
of corn, mitochondria of, peroxidases in, 1597
of radish, plasma membrane Ca^{2+}-ATPase in, regulatory domain of, 105
of rice
carbohydrate metabolism in, anoxia and, 735
salicylic acid in, 633
vacuolar H^+-translocating pyrophosphatase in, anoxia and chilling and, 641
of wheat, abscisic acid-responsive protein kinase in, regulation of, 1203
Senescence
of broccoli floret, *pbroc* cDNA in, 857, 859
of castor bean leaf, phospholipase D expression in, 713
of orchid petal, aminocyclopropane-1-carboxylate oxidase in, 833
of rose petal, membrane lipids and, 1029
Shoot, of soybean, at CO_2 compensation point, photosynthesis and nitrogenase activity in, 1455
Signal transduction
cyclic AMP in, 885
protein kinase and, 451
Sinapis alba (*see* Mustard)
Solanum commersonii (*see* Potato, wild)
Solanum melongena (*see* Eggplant)
Solanum tuberosum (*see* Potato)
Sorghum, phytochrome-deficient
gibberellin biosynthesis in, 337
photoperiod sensitivity in, 345
Soybean
chilling-induced heat evolution in, 995
cotyledon of, protoplasts from, 4-aminobutyrate shunt in, subcellular compartmentation of, 99
GH2/4 gene in, chemical agent activation of, 919
G protein α subunit in, 1315
leaf of
methanol emission from, 1359
nucleotide pyrophosphatase/phosphodiesterase I in, 1269
proteinase from, 969
low molecular mass heat-shock protein complex in, 693
mycorrhizal, rhizobial nodulation factors and, 1519
Pseudomonas syringae interaction with, peroxidative and H_2O_2 scavenging and, 353
root of, actin network of, aluminum-induced rigor in, 897
root nodule of
genistein-incubated *Bradyrhizobium japonicum* and, 961
oxygen-induced membrane depolarizations in, 235
phospho*enol*pyruvate carboxylase in, phosphorylation of, 1561
seed of, fatty acid hydroperoxide in, chain cleavage of, 1211
shoot of, at CO_2 compensation point, photosynthesis and nitrogenase activity in, 1455
tissue of
allene oxide synthase and cyclase in, 199
glutamate decarboxylase in, calcium/calmodulin activation of, 543
Spear, of asparagus, β-galactosidase in, 419
Spinach
chloroplast of
chlorophyll fluorescence in, quenching of, 721
development of, 685
oxidative pentose phosphate pathway in, 609
choline monooxygenase in, 581
cytosolic ascorbate peroxidase in, 1325
leaf of
chlorophyll fluorescence in, quenching of, 721
nitrate reductase in, regulation of, 1083

oxidative pentose phosphate pathway in, 609
protein kinases and nitrate reductase in, 1077, 1083
protein kinases and sucrose-phosphate synthase in, 1077
sucrose-phosphate synthase in, antibodies cross-reacting with, 219
thylakoid membrane of, potassium channel protein in, 1725
Sporamin, in sweet potato, 829
Spruce, Norway, stress lignin in, 1277
Starch
degradation of, pea chloroplast α-glucosidase and, 211
mobilization of, in tobacco leaf, fructose bisphosphate level and, 1569
Starch branching enzyme I, in corn endosperm, 1313
Starch synthase, soluble, from rice, genetic structure of, 677
Stearoyl-acyl carrier protein desaturase, from rice seed, 845
Stellaria longpipes (*see* Chick weed)
Stem, of potato, deoxy-D-*arabino*-heptulosonate-7-phosphate synthase and, 1413
Stomatal aperture, of broad bean, temperature control of, potassium channels and, 1161
Stylosanthes humilis
cationic peroxidase gene in, 1303
phenylalanine ammonia-lyase in, 1301
Succinate, alternative pathway stimulation by, in potato tuber callus mitochondria, 1035
Sucrose-phosphate synthase, in spinach leaf
antibodies cross-reacting with, 219
protein kinases and, 1077
Sucrose synthase, in carrot, 75
Sugar beet (*see* Beet)
Sunflower leaf, chloroplast stroma in, pH regulation in, 1059
Sweet potato
cellular ubiquinone in, in vivo reduction of, 277
Cu/Zn-superoxide dismutase in, 827
sporamin gene in, 829
Synechococcus
carboxylase-deficient mutant of, Rubisco activation state in, 183
genomic region upstream of *rbcLS* in, 1461
psbA genes in, 1305
UTEX 625, nitrite reduction in, inorganic carbon and, 313
Synechocystis, photosystem I polypeptides in, 1067
Systemin signaling, in tomato leaf, salicylic acid and, 1741

T

Tamarind seed, xyloglucan fragment fractionation and cellulose interaction in, 1579
Thylakoid
of spinach, potassium channel protein in, 1725
of wheat, lipid composition and protein dynamics in, drought sensitivity and, 191
Tobacco
acetyl-coenzyme A carboxylase in, biotin carboxylase subunit of, 805
cell-wall invertase in, 825
cytosolic ascorbate peroxidase in, 839
heat-shock-induced calmodulin-binding protein in, 1197
leaf of
chloroplast stroma in, pH regulation in, 1059
GTP-binding proteins in, 59
indoleacetic acid in, measurement of, 1043
PR-1 proteins in, antifungal activity of, 17
RNA-dependent protein kinase encoded by, 1259
salicylic acid biosynthesis in, hydrogen peroxide and, 1673
starch mobilization in, fructose bisphosphate level and, 1569
violaxathin cycle pigment content in, 1479
osmotolerance in, proline accumulation and, overexpression of pyrroline-5-carboxylate synthetase and, 1387
photosystem I gene in, 1297
Pseudomonas syringae interaction with, peroxidative and H_2O_2 scavenging and, 353
S_7-RNAse in, 427
transgenic, kiwifruit protease actinidin processing in, 261
Tomato
apo-β-methylcrotonyl-coenzyme A in, 1133
apoplast of, ionic composition of, during fruit ripening, 1679
chilling-induced heat evolution in, 995
chloronerva mutant of, iron localization in, 269
fruit of
aminocyclopropane-1-carboxylic acid *N*-malonyltransferase in, 1241
exo-(1→4)-β-D-galactanase in, 1099
ripening of, apoplast ionic composition during, 1679
isocitrate lyase in, 1339
leaf of
PR-1 proteins in, antifungal activity of, 17
systemin and jasmonic acid signaling in, salicylic acid and, 1741
red light-insensitive mutants of, 939
root of, Cu^{2+} reduction by, 1093
wounding of, ascorbate free radical reductase induction by, 411
Trifolium repens (*see* Clover, white)
Triticum (*see* Wheat)
Tropane alkaloid biosynthesis, in *Hyoscyamus muticus*, 1553
Tuber callus mitochondria, of potato, alternative pathway of, succinate and malate stimulation of, 1035
Turion morphogenesis, in duckweed, abscisic acid and, 623

U

Ubiquinone, cellular, in vivo reduction of, 277
Ubiquitin protein, in rice, 865
Ultraviolet light
DNA damage from, repair of, 891
inhibition of flavonoid biosynthesis and DNA photolyase formation by, in mustard cotyledon, 227
Uromyces appendiculatus, on bean leaf, chlorophyll fluorescence induction and, 163

V

Velvet bean leaf, methanol emission from, 1359
Vesicular-arbuscular mycorrhizal leek, carbon metabolism in, 7
Vessel-associated cells, in *Robinia* wood, vascular sap pH and, 913
Vicia faba (*see* Broad bean)
Vigna radiata (*see* Mung bean)
Violaxathin cycle pigment content, in potato and tobacco leaf, 1479

W

Watermelon cotyledon, peroxisomal Cu/Zn-superoxide dismutase in, 1151
Water stress
corn root growth and, 303
in pea nodule, antioxidants and pro-oxidants and, 753
Wheat
carbohydrate accumulation and photosynthetic gene expression in, atmospheric CO_2 and, 975
grain of, glycosylated protein disulfide isomerase in, 327
leaf of, mitochondrial increase in, elevated CO_2 and, 469
-*Lophopyrum elongatum* amphiploid, salt-tolerant, solute regulation in, 1715
seedling of, abscisic acid-responsive protein kinase in, regulation of, 1203
thylakoid of, lipid composition and protein dynamics in, drought sensitivity and, 191
Wollastonia biflora, dimethylsulfoniopropionate biosynthesis in, 1439

X

Xanthophyll cycle, in pea plants, 149
Xylem, of loblolly pine, coumarate:coenzyme A in, 85
Xyloglucan *endo*transglycosylase homolog, in corn root, 439
Xyloglucan fragment, in tamarind seed, fractionation and cellulose interaction in, 1579

Z

Zea mays (*see* Corn)
Zeatin-*O*-glucoside-degrading β-glucosidase, in rape seed, 1369
Zinnia elegans, lignin *O*-methyltransferases in, 459
Zostera marina (*see* Eelgrass)
